I. Program Overview

Topic: *Business Breakthrough in China's Economic New Normal: The Evolving Chinese Business Culture in an Ever-changing Global Context*

Description: In recent decades, the rapid economic development of China has created increasing business opportunities for people in other countries. Engaging in the Chinese market has become a must for international companies. The objective of this program is for students to know the general profile of China's business environment where economic transactions happen, and to be able to make sense of various business phenomena in China, It should help students to develop their critical view of "the China model" or "China experience". Through dynamic discussion, interactive case studies, and company visits the students will explore a broad range of the concepts of doing business in China.

Currently, the company's manufacturing facilities are in Beijing, Shanghai, Chengdu Hefei, Huiyang and Shenzhen, China; Pondicherry, India; Monterrey, Mexico; Itu, Brazil, as well as Whitsett, North Carolina in the U.S., with contract manufacturing and Original Design Manufacturing locations worldwide shares of Lenovo are listed in the Stock Exchange of Hong Kong (HKSE stock code: 0992), and available in the form of ADR shares (ADR: LNVGY).

Bosch worldwide: 4 business sectors; 52.5 billion euros in sales in Year 2012

Bosch in Asia Pacific: 12.6 billion euros in sales in Year 2012; 5.66% year-on-year growth

Bosch in China: 2nd largest market outside Germany; 58 legal entities; 3,200 R&D associates and 17 Technical centers

The Bosch Group is a leading global supplier of technology and services. In 2012, its roughly 306,00 associates generated sales of 52.5 billion euros. Since the beginning of 2013, its operations have been divided into four business sectors: Automotive Technology, industrial Technology, Consumer Goods, and Energy and Building Technology. The company was set up in Stuttgart in 1886 by Robert Bosch (1861—1942) as “Workshop for Precision Mechanics and Electrical Engineering.” The special ownership structure of Robert Bosch GmbH guarantees the entrepreneurial freedom of the Bosch Group, making it possible for the company to plan over the long term and to undertake significant upfront investments in the safeguarding of its future.

The Bosch Group comprises Robert Bosch GmbH and its roughly 360 subsidiaries and regional companies in some 50 countries. If its sales and service partners are included, then Bosch is represented in roughly 150 countries. This worldwide development, manufacturing, and sales network is the foundation for further growth. Bosch spent some 4.8 billion euros on research and development in 2012, and applied for nearly 4,800 patents worldwide. The Bosch Group’s products and services are designed to fascinate, and to improve the quality of life by providing solutions which are both innovative and beneficial. In this way, the company offers technology worldwide that is “Invented for life”.

Bosch set up its first sales office in China as early as 1909. In 1926 the first Bosch car service was opened in Shanghai. Today, all three Bosch business sectors are present in China: Automotive Technology, Industrial Technology, and Consumer Goods and Building Technology. Bosch employs 30,200 associates at 51 legal entities across China, and has a holding company in Shanghai. Consolidated sales in China reached 42.3 billion yuan in 2011. This robust growth testifies to the effectiveness of Bosch's strategic approach in China, which was chosen in close alignment with China's goals for a sustainable and low-carbon economy. Today, all three Bosch business sectors in China focus their innovations on energy efficiency and resource conservation. The products and solutions manufactured by Bosch in China for the Chinese market range from clean diesel systems, products for powertrain electrification, and gearboxes for wind turbines to heat pumps, energy-efficient home appliances, and lithium-ion power tools.
